Test Case Design

Course title: Software Engineering Laboratory
Course code: CSE 3206
Session: Jul-Dec 2026

Date of Submission: *1st October, 2026*

Submitted to-

Rumana Yasmin

MatchFusion

Feature: Match Analysis

Test Case Design

Field	Details
Test Case ID	TC-MF-MA-01
Test Scenario	Verify that the system correctly displays the complete match analysis when a user selects a valid football match with available match information and statistics.
Preconditions	1. User is on the MatchFusion website.2. A valid football match is available in the Match Center.3. Match score, events, and available statistics are available for the selected match.
Test Steps	1. Navigate to the Match Center page.2. Select Football.3. Select an available match.4. Click on Match Details / Match Analysis.5. View the score, events, statistics, and team comparison.
Input Data	Selected Match: Valid football matchMatch Data: Score, match events, team statistics, and available performance data
Expected Result	The system successfully displays the selected match's score, match status, events, statistics, and available team comparison information. Charts or visual representations of available statistics are also displayed correctly.
Actual Result	*(To be completed during test execution)*
Status	*(Pass / Fail)*
Remarks	Validates the Match Analysis functionality using a valid match and available analysis data.

Feature: AI Match Insights

Test Case Design

Field	Details
Test Case ID	TC-MF-AI-01
Test Scenario	Verify that the system generates and displays AI-based match insights and probability-based prediction when sufficient match and performance data are available.
Preconditions	1. User is on the MatchFusion website.2. A valid football match is selected.3. Required match and performance data are available.4. The AI service is available for processing the request.
Test Steps	1. Navigate to the Match Center page.2. Select a valid football match.3. Open the AI Match Insights section.4. Click Generate Insight / Analyze Match.5. Wait for the AI analysis to complete.6. Observe the prediction percentages and explanation.
Input Data	Selected Match: Valid football matchMatch Data: Recent form, team performance, player performance, and available match statistics
Expected Result	The system successfully generates and displays AI-based match insights, including probability-based predictions for the competing teams and draw, along with a clear explanation based on the available match and performance information.
Actual Result	*(To be completed during test execution)*
Status	*(Pass / Fail)*
Remarks	Validates the AI Match Insights feature using valid match and performance data. The prediction is presented as a probability-based insight, not a guaranteed result.
