MATCHFUSION

1. Live Match Center

Field	Details
Test Case ID	TC-MF-LMC-01
Test Scenario	Verify that the Live Match Center correctly displays matches according to their current status: Live, Upcoming, or Completed.
Requirement	Live Match Center
Preconditions	1. User has opened MatchFusion. 2. Football/Cricket sports API is available. 3. Match data contains Live, Upcoming, and Completed matches.
Test Steps	1. Open MatchFusion. 2. Navigate to Match Center. 3. Select Live filter. 4. Observe the displayed matches. 5. Select Upcoming filter. 6. Observe the displayed matches. 7. Select Completed filter. 8. Observe the displayed matches.
Input Data	Live Match: Team A vs Team B — Status: LIVE Upcoming Match: Team C vs Team D — Status: UPCOMING Completed Match: Team E vs Team F — Status: COMPLETED
Expected Result	Live: Only currently running matches are displayed. Upcoming: Matches that have not started are displayed. Completed: Finished matches are displayed with their final result/score. Each match appears under the appropriate status and the user can switch between the three categories.
Actual Result	To be completed during test execution.
Status	Pass / Fail
Remarks	Verifies correct match categorization and status-based display in the Live Match Center.

2. Performance Analytics

Field	Details
Test Case ID	TC-MF-PA-01
Test Scenario	Verify that Performance Analytics correctly displays charts, performance trends, and comparative statistics for selected teams/players.
Requirement	Performance Analytics
Preconditions	1. User has opened MatchFusion. 2. Valid team/player performance data is available from the sports API/database. 3. At least two teams or players have sufficient statistics for comparison.
Test Steps	1. Open MatchFusion. 2. Navigate to Performance Analytics. 3. Select a team, for example Team A. 4. Select the required performance period/data. 5. Observe the performance chart/trend. 6. Select Team B for comparison. 7. Compare the displayed statistics. 8. Verify that the chart and numerical values correspond to the available data.
Input Data	Team A: Matches = 5, Wins = 3, Draws = 1, Losses = 1, Goals = 8 | Team B: Matches = 5, Wins = 2, Draws = 2, Losses = 1, Goals = 6
Expected Result	The system displays the selected teams' performance statistics correctly. A chart/trend is generated from the available data. Comparative statistics for Team A and Team B are displayed clearly. The values shown in the chart correspond to the underlying statistics.
Actual Result	To be completed during test execution.
Status	Pass / Fail
Remarks	Verifies that MatchFusion can visualize performance data and compare statistics between selected teams.
